

Scoping and Environmental Review Process

- Scoping is an early and open process for determining the scope of issues to be addressed related to a proposed action.
- This scoping meeting provides an early opportunity for NYSDOT to provide information about the proposed action and receive public and agency input.
- During the environmental review process, NYSDOT will assess and document the potential social, economic, and environmental effects of the proposed action.
- NYSDOT will provide meaningful opportunities for public participation throughout the project.
