Source: United States Census Bureau, 2015-2019 American Community Survey 5-Year Estimates (B16004 - Language Spoken at Home by Ability to Speak English for the Population 5 Years and Over; data collected at Block Group level).

The 2020 Decennial Census does not offer corresponding LEP data.

Note: The limited English proficiency (LEP) category represents all individuals who speak English less than "very well," based on U.S. Census Bureau statistics. At the census tract level, the U.S. Census Bureau dataset provides only four categories of non-English languages spoken at home: "Spanish," "other Indo-European," "Asian and Pacific Island," and "other language."

Note: Total population represents the number of individuals that answered this Census question and does not necessarily match the total population of individuals within each Census Tract.
